PROFESSIONAL SUMMARY

IT Infrastructure professional with 4+ years of experience across enterprise infrastructure, system administration, Microsoft 365, Windows Server, Microsoft Entra ID (Azure AD), Linux, networking, cloud services, backup, endpoint security and IT operations. Currently working as a Senior IT Executive at Jakson Group with hands-on Cloud and DevOps expertise in AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, Git/GitHub, CI/CD, Python, PowerShell and Infrastructure as Code. Experienced in supporting business-critical environments and building practical automation solutions focused on reliability, security and operational efficiency.

TECHNICAL SKILLS

Cloud & DevOps: AWS, Microsoft Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD, Git, GitHub, Infrastructure as Code (IaC)

Systems & Identity: Windows Server, Linux, Microsoft 365, Microsoft Entra ID (Azure AD), Active Directory, Group Policy, DNS, DHCP

Network & Security: TCP/IP, LAN/WAN, VPN, Firewall Administration, Network Troubleshooting .

Automation & Tools: Python, PowerShell, Bash/Shell, ManageEngine Endpoint Central/MDM, Druva Backup, Classic Outlook Automation

PROFESSIONAL EXPERIENCE

Senior IT Executive - IT Infrastructure | Jakson Group

Noida, Uttar Pradesh, India | Aug 2024 - Present

- Administer enterprise IT infrastructure across Windows and Linux servers, Microsoft 365, Microsoft Entra ID, Active Directory, DNS/DHCP, networking, firewall and VPN services.
- Manage Microsoft 365 user lifecycle, licensing, identity and access activities across a multi-tenant environment; troubleshoot collaboration and endpoint issues.
- Support monitoring, endpoint security and backup operations using ManageEngine Endpoint Central/MDM and Druva; coordinate incident resolution and root-cause analysis.
- Automate repetitive IT and reporting tasks using Python and PowerShell, and build practical Cloud/DevOps automation projects using AWS, Terraform, Docker, Kubernetes and Jenkins.
- Coordinate cloud, network, security and software procurement/renewal activities with internal stakeholders and vendors while supporting uninterrupted business operations.

Engineer - IT / Systems & Network Support | UKB Electronics Pvt. Ltd.

Noida, Uttar Pradesh, India | 2022 - 2024

- Diagnosed and resolved computer, network, application and end-user technology issues; provided day-to-day technical support.
- Installed, configured and maintained routers, switches, firewalls, Windows systems and related hardware/software infrastructure.
- Implemented firewall rules and security policies and performed network troubleshooting across enterprise environments.
- Performed basic Windows Server administration, including Active Directory user accounts, permissions and server operations.
- Supported SAP and SharePoint users and maintained NAS storage used as a backup target.

SELECTED CLOUD, DEVOPS & AUTOMATION PROJECTS

AWS Infrastructure Automation with Terraform | AWS | Terraform | Linux | IaC

Built reusable Terraform configurations to provision AWS VPC, subnet, Internet Gateway, route tables, security groups and EC2 resources; practiced init, fmt, validate, plan, apply and destroy workflows.

CI/CD Pipeline with Jenkins, Docker & Kubernetes | Jenkins | GitHub | Docker | Kubernetes | CI/CD

Implemented a hands-on CI/CD workflow where source changes are pulled from GitHub, built through Jenkins, packaged into Docker images and deployed to Kubernetes for automated delivery.

Containerization & Kubernetes Deployment Labs | Docker | Kubernetes | Linux

Built and ran container images, worked with registries and port mapping, and deployed applications using Kubernetes Pods, Deployments, Services and related workload concepts.

AI Vendor Negotiation Agent | Python | Classic Outlook | PDF/Excel Parsing | Automation

Developed a procurement automation workflow that sends RFQs through Outlook, extracts quotation data from email bodies/PDF/Excel files, supports up to three negotiation rounds, and generates a final vendor comparison with unit price and ranking.

Linux System Administration Labs | Linux | Bash | System Administration

Practiced Linux file and permission management, users/groups, services and processes, package operations, logs, shell commands and basic Bash scripting through hands-on administration labs.

Git & GitHub Version Control Practice | Git | GitHub | Version Control

Worked with repositories, commits, branches, merges, push/pull workflows and remote collaboration concepts to manage source code and support DevOps project delivery.

CERTIFICATIONS

- Certificate of Completion - DevOps, Tutedude (Sep 2026)
- Build Conversational AI Memory with LangGraph - 365 Data Science (Jul 2026)
- Intro to AI Agents and Agentic AI - 365 Data Science (Jun 2026)
- Introduction to Data Architecture - 365 Data Science (Jun 2026)
- Python Developer: Zero to Mastery - Udemy
- Ethical Hacking - Udemy

EDUCATION

Master of Computer Applications (MCA) - Computer Science | Lovely Professional University | 2022 - Present

Bachelor of Computer Applications (BCA) - Computer Science | Baba Mastnath University | 2018 - 2021
